## **DETAILED ACTION**

### ***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Steven Laut on 6/20/2007.

2. Cancel claims 13-20.

### ***Reasons For Allowance***

3. The following is an examiner's statement of reasons for allowance: The present invention is directed to template type electrophoretic display comprising a lower electrode formed on an under layer; a lower electrode protection layer formed on the lower electrode; an insulating template formed on the lower electrode protection layer; a dielectric fluid filling the holes and having a color; a plurality of charge particles suspended in the dielectric fluid. The combination of the closest prior art of Sheridan (US 5,917,646), Gates et al. (US 6,704,133) and Kawai (US 7,079,302) showed a similar invention; however, they fail to teach that an insulating template formed on the lower electrode protection layer and having a plurality of holes of smaller size than the wavelength of visible rays region; a plurality of charged particles suspended in the dielectric fluid filling each of the plurality of holes having a color different from the color of the dielectric fluid; and an upper electrode formed on the insulating template in sequential order as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
